

EXPERIENCE CERTIFICATE

This is to certify that Subash Krishnan has completed an internship at the Centre for Research and Innovation in Health Tech as Application Development Intern from July 2024 to February 2025.

During this internship, Subash Krishnan demonstrated exceptional proficiency in mobile application backend developer.

Subash Krishnan functioned as a Backend Developer, providing essential support for the project's core infrastructure. His responsibilities included conducting initial background research and implementing the security protocol for the application to store and retrieve sensitive patient information.

Projects :

1. Ophthalmologic Visual Function Scoring Application
2. Laboratory Report Application

Key responsibilities he took

- Research on patient record management, security protocols
- Data modeling for patient record management and engineered a relational database schema specifically for patient data, lab tests, ensuring both reliable data persistence and efficient data retrieval mechanisms
- Designed server-side routing logic for page navigation and configured the entire database environment

He consistently displayed a high degree of competence, a strong theoretical understanding of mobile development principles, and excellent communication skills. Subash Krishnan is a highly motivated and quick learner with a bright future in this field.

Subash Krishnan is currently doing his Final year BE CSE at the SONA COLLEGE OF TECHNOLOGY.

We found him to be a dedicated and valuable asset to our team.
